_____ The project abstract is designed to describe the research, goals, and results in language easily read by the user

Provide a budget table and justifications of the proposed budget. An example budget table is given below. Salary calculations should utilize the primary amount as listed in Banner and may include a 2-3% cost of living in the second year of funding. Fringe should be calculated based on actual costs. University Career Center rates for students \$40 per hour for undergraduate, \$1,000 per month for graduate student pursuing master degrees, and \$1,500 per month for graduates students pursuing doctoral degrees. For master and doctoral students, the specified rates are at 50% FTE, so monthly rates could be smaller if budgeted for a smaller amount of time.

Provide budget justification. Be aware that all funding and costs are required by law to be reasonable, allowable, and allocable. These line items will include PI time along with any fringe benefits, supplies, subcontract, equipment, printing, travel (mileage to research site only), etc. A corresponding budget narrative must clearly identify the cost of each line item. Salaries must be listed in conjunction with the identified personnel. Funding for anyone listed on other awards, grants, agreements, or contracts, or teaching is subject to ORSPA rvt1 (e)4 (as)-1 (p82hhhhhhhhhat15 Td)o69J -25.54 1 (t)-e(RSr125.54 1* [(and 4 (l)-2 (ude)4 (P)
